Summary

Full Stack Developer with hands-on experience building scalable web applications using React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, integrating frontend and backend services, and implementing authentication systems using JWT and NextAuth. Experienced working in Agile teams and delivering maintainable, user-focused applications. Passionate about clean architecture, performance optimization, and building scalable software solutions.

Professional Experience

Full Stack Development Trainee | Digilians (MCIT)
Cairo, Egypt | 1/2026 – 06/2026

- Participating in a MERN Stack training program focused on modern web technologies.
- Building web applications using React.js, Next.js, Node.js, Express.js, and MongoDB.
- Developing RESTful APIs and integrating frontend with backend services.
- Collaborating in Agile teams using Git/GitHub and clean code practices.

Frontend Developer Intern, *Elevate Tech*
Cairo, Egypt | 11/2024 – 06/2025
Developed 3 production-level applications using React.js, Next.js, and TypeScript.• Implemented authentication, form validation, API integration, and responsive UI development.• Collaborated in Agile teams through code reviews, sprint planning, and Git workflows.

Projects

Sanda – Recruitment & Job Management Platform (Full Stack Project)
GitHub | ***LiveDemo***
React, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Socket.io, REST APIs
• Contributed to a full-stack workforce marketplace connecting employers, workers, and administrators through role-based workflows.

- Implemented and integrated job lifecycle features including job posting, applications, applicant management, and status tracking.

• Handled frontend authorization flows, wallet states, real-time notifications, and QR attendance check-in features.• Improved platform reliability through reusable form components, validation, loading states, and safe API error handling.

E-Commerce Flower Shop – Admin Dashboard (Team Project)
GitHub | ***Live Demo***

- Collaborated with a team of 5 developers in Agile/Scrum environment, contributing to sprint planning, peer reviews, and version control (Git/GitHub).
- Delivered a full e-commerce platform with responsive storefront and secure admin dashboard.
- Implemented product filtering, Stripe checkout, and authentication with NextAuth.
- Built CRUD for products & categories, with real-time analytics and sales visualization.
- Localized platform with next-intl, and enhanced UX with Tailwind CSS & Shadcn.

- **Tech Stack**: Next.js 14, TypeScript, Tailwind, Shadcn, Stripe, Zod, React Hook Form, TanStack Query.

Super Fitness App (Team Project)
GitHub | ***Live Demo***
- Collaborated with a team of 4 developers in an Agile/Scrum environment, contributing to sprint planning, peer code reviews, and Git/GitHub workflows.
- Built a multilingual fitness platform that allows users to track workouts by level, access healthy recipes, and engage with an AI-powered chatbot.
- Integrated secure form validation (Zod + React Hook Form) and server-state management with React Query, reducing input errors and improving reliability.
- Localized the platform with use-intl, enabling multi-language support and enhancing accessibility.

Tech Stack: React, TypeScript, Axios, Tailwind CSS, Shadcn/UI, React Query, Zod, React Hook Form, use-intl.

Online-Exam
GitHub | ***LiveDemo***

- Integrated backend APIs to render dynamic exam questions with timer.
- Implemented auto-calculated results and validation on submission.
- Secured authentication with NextAuth and localized UI with next-intl.
- **Tech Stack**: Next.js, TypeScript, NextAuth, Zod, React Hook Form, Tailwind CSS ,TanStack Query.

E-Commerce Backend API – Node.js & MongoDB
GitHub
Designed and developed a scalable RESTful API for a full-featured E-Commerce platform.
- Implemented authentication & authorization using JWT
- Built shopping cart, wishlist, coupon & order management system
- Integrated Stripe payment gateway & cash-on-delivery workflow
- Added advanced search, filtering, pagination & rating system
- Implemented secure file upload & image processing
- Deployed backend-ready production architecture

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, Stripe, REST API .

Education

Frontend Development Diploma, *Route Academy* 12/2023 – 06/2024

Bachelor of business administration, *zagazig university* 2018 – 2022

Skills

Frontend:
React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Shadcn/UI, Bootstrap, Responsive Design, React Query, Context API, Redux, React Hook Form, Zod, REST APIs, JWT, NextAuth, next-intl

Backend:
Node.js, Express.js, MongoDB
Tools & Workflow: Git, GitHub, Agile/Scrum, CI/CD

Languages

- Arabic
- English
